

If you are bored of doing the same tasks day after day, but you are smart enough to optimize these ways or to find independent solutions for varied projects, then you are exactly right with us!

We are looking for the reinforcement of our team at the next possible date

Application Developer (m/f/d)

Your profile:

- completed training as an IT specialist with a focus on application development, a (business) computer science degree or comparable training
- experience with BPM systems is an advantage
- knowledge in the areas of XML/XSLT/XSL-FO
- systematic, structured as well as result-oriented way of working
- independent solution finding for situational problem descriptions
- careful work in a team as well as alone
- strong communication skills, conceptual thinking and enjoyment of exciting tasks

Your tasks:

- support our team in the development of automated IT processes using BPM software
- realization of complex, varied projects based on individual requirements
- adaptations to existing BPM processes
- carrying out functional tests

Our benefits:

- cooperation in an established company with a solid customer base
- exciting tasks in an appealing working environment with motivated and helpful colleagues
- an attractive, future-oriented workplace
- living teamwork with flat hierarchies
- a friendly, familiar working atmosphere
- an expandable career entry opportunity for graduates
- entry into workflow programming after extensive training
- development opportunities and subsidized further training

- home office after arrangement
- performance-based pay
- attractive offers and discounts with well-known partners
- modern lounge with its own fully equipped kitchen
- fresh water and hot drinks for all employees
- table football for the breaks
- various employee events
